

*I wish you a good day dear Albafos,*

*I answer you as admin forum where you added a link to your blog.*

*I am very glad that you are interested in spiritual and philosophical side of enforcement inserting chips. In my opinion and in opinion of my colleagues this is a serious global problem. Among us is a lot of religious people, so we understand your opinion and recommendations. You belong to the people with an open mind / heart, who suggested a way how to get out of this "chip totality".*

*Dr. Katina Michael with a team of her husband professor M.G. Michaela from the prestigious Australian university (University of Wollongong) are for many years involved in scientific research about tagging (via chip) people / animals / things and effects of this dangerous phenomenon in the last few decades. Dr. Katherine Albrecht, who graduated the prestigious Harvard University in Massachusetts, also disagrees with tagging (via chip) people / animals / things. She has written several books about this topic, for example "Spychips: How major corporations and government plan to track your every move with RFID" and "The Sychips Threat: Why Christians should resist RFID and electronic surveillance". She also provided more than 2 000 interviews for television stations (CNN, MSNBC, etc.) and also were published several articles in newspapers (Washington Times, New York Times, etc.). Dr. Albrecht openly admits faith in God and Dr. Albrecht openly admits faith in God and supports the idea of former senator Ron Paul about freedom, honor and dignity.*

*I wish you all the best on your journey through life. With wish of God's blessings I greet you warmly! Admin :)*
